

# Electronics Engineer

## ABOUT THE ROLE

As an Electronics Engineer at Qinu, you will work in the field of automation and information technology. In our team, you will contribute with planning, developing, building, and assembling of electronic devices and systems as well as implementing these in electronic processes. As a valued member of this team, you will be working on the development, fabrication, and maintenance of our cryogenic systems. Besides a sustainable job opportunity, we would provide you with advanced knowledge of cryogenic physics and engineering. In addition, you can become a part of Qinu's core team – with broad career development opportunity and long-term job prospect.

## QUALIFICATIONS & SKILLS

- Successfully completed degree (PhD, Dipl.-Ing. (FH/BA), M.Sc. or B.Sc.) in electronic/mechatronic engineering or similar
- Advanced electronic and electrical knowledge as well as a basic knowledge about integrated circuits and PCB design are essential.
- High level of computer literacy
- Good written and spoken German or English
- High degree of self-motivation and good work ethics
- Ability to work independently and as part of a team

## FURTHER INFORMATION

- This is a full-time position with at least 38 hours per week.
- Flexible working hours and home office (hybrid work) are possible.
- We offer an attractive salary with different capital-forming and non-cash benefits.
- We also give career starters and career changers with technical understanding and high motivation a chance.
- First round of interviews will be conducted via video conference.
- Please apply by submitting a CV and a covering letter (including the earliest possible start date) via email to [hr@qinu.de](mailto:hr@qinu.de).
- If you have further questions, please do not hesitate to contact us!
